                                        Answer: _____

4. What is the time in the clock below?

[Example: Write your answer as 8.40 or 8:40]

Answer: _____

5. Find the missing number.

5.10 is 10 minutes past _____ .

Answer: _____

# SOLUTIONS

### Problem 1

1 hour  =  60 min

60 min  −  48 min  =  12 min

9.48 is 12 minutes before 10 o'clock.

So, 9.48 is 12 minutes to 10.

### Problem 2

1 hour  =  60 min

60 min  −  28 min  =  32 min

28 minutes to 8 is 32 minutes after 7 o'clock.

So, the time is 7.32.

### Problem 3

8.14 is 14 minutes after 8 o'clock.

So, 8.14 is 14 minutes past 8.

### Problem 4

Each small marking on the clock stands for 1 minute.

The minute hand shows 03 minutes.

The hour hand is between 2 and 3.

So, the time is 2.03.

### Problem 5

5.10 is 10 minutes after 5 o'clock.
So, 5.10 is 10 minutes past 5.
